VI) Read the passage given below. Answer the questions that follow:

5 x 1 = 5 M

The Titanic, is in its watery grave. It is a great museum of human history and is at risk of being lost forever because of curious voyagers and treasure hunters, fears Bob Ballard, who first discovered the remains of the iconic ship in 1985. Famous for discovering the great ship, Ballard is a former U.S.Navy Officer and a professor of oceanography. He presented a documentary called "Save the Titanic" on the 100th anniversary of the sinking of the great ship- April 15, 1912. The ship and her fate continue to fascinate, largely because of the horror that took place that night, with 1,522 passengers and crew losing their lives. Ballard says, "The story has all the ingredients to make it timelessly fascination. You have this revolutionary ship that's unsinkable and carrying a cross section of people in society. And then it goes and hits an iceberg and sinks on its maiden journey. It's an irony personified in history."

- XV) Read the following passage and make notes:** **1x5=5M**

The process of study involves four operations- perception, comprehension, retention and retrieval. In other words, you should first perceive what is relevant to your needs and select only those areas which are important. You cannot study everything available in every book you can lay your hands on. Once you have decided on areas, which are important, you have to read and understand- or comprehend the material that you have selected - for no learning can take place without comprehension. What is not understood is not learnt. Comprehension is thus imperative in the process of learning. However, mere comprehension is not enough. What one understands now, may also be easily forgotten later. Hence, you, as a student, have to make special efforts to retain what you comprehend. You also have to retrieve all that you learn throughout the year at the time of examination.

Madanapalle

Sir

Sub: Complaint about the poor sanitary conditions and mosquito menace in Nehru Nagar

- Submitted - Reg.

I would like to bring the following few lines to your kind notice. I am a resident of Nehru Nagar in Madanapalle Municipality. In our area, sanitary conditions are very poor and garbage is dumped everywhere. The municipal workers are not cleaning the streets and garbage bins daily. Due to this, pedestrians are struggling a lot.

The public toilets also stink and are not cleaned by the sanitation workers every day. This is a major cause of breeding mosquitoes. Contaminated water and waste material are the reason for the diseases such as dengue, diarrhea and others.

For the interest of public health, I request that immediate action be taken against the poor sanitary conditions.

Thanking you sir

Yours sincerely

Sir

Sub: Request for the issue of my transfer, bonafide and conduct certificates - Submitted - Reg.

I was an MPC group student of your college during the academic years 2017-19. My roll number was 27. I have passed Intermediate course with 956 Marks in IPE March 2019. I have secured a good rank in JEE MAINS Examination.

As you are aware, I need to submit transfer, bonafide and conduct certificates in the engineering college. I have already submitted the 'No-due certificate'. Therefore, I request you to instruct the office to issue me those certificates at an early date.

Thanking you sir

Yours faithfully

**XI) Write a short paragraph of about 8 lines describing the process**

**1x5=5M**

**Describe the process of applying for a job.**

**OR**

**Describe the process of how you get ready for college regularly.**

**A: PROCESS OF APPLYING FOR A JOB**

The first and best thing to do before applying for a job is to have awareness on job notifications. They are advertised in newspapers, employment news, electronic media etc. Then you have to select a notification of your choice. The next thing to do is to go through the job description provided in the notification. Now, the most important thing is to prepare resume as per the requirements of the company that you are applying for. This should contain your contact details, objective, Education qualifications, Work experience, Strengths, other details, References and finally declaration. Later you have to prepare a covering letter along with your resume. Finally, post the resume along with the covering letter to the designated official within the prescribed time.

**PROCESS OF GETTING READY FOR COLLEGE REGULARLY**

Usually, I wake up at about 5.00 a.m. After getting up, I go for a walk for half an hour. Little walking is a tiny part of my life and it keeps us healthy. Then I come back home and finish my bath and all. I spend one hour on my studies, either learning something or drawing or writing. It is the pleasant time for anyone to do their work with concentration. I drink a glass of warm milk. At about 7.30 am, I will have my breakfast. Then I put the required books in my bag. At about 8.00 am, I will take my lunch box and I go to the place, to where my college bus arrives. When the bus comes, I shall get into the bus and I will attend college.

Student : Thank you, sir. I need your advice for my future career.

Lecturer : What advice do you want?

Student : Please tell me about the study options available after Intermediate M.P.C group.

Lecturer : Well, you have quite good number of options with M.P.C group. You can go for Engineering or Degree B.Sc., with M.P.C or M.P.Cs.

Student : I want to study MCA after my graduation, sir.

Lecturer : Oh! Then it is better to take B.Sc., with computer science.

Student : Thank you very much, sir for giving me your valuable advice.

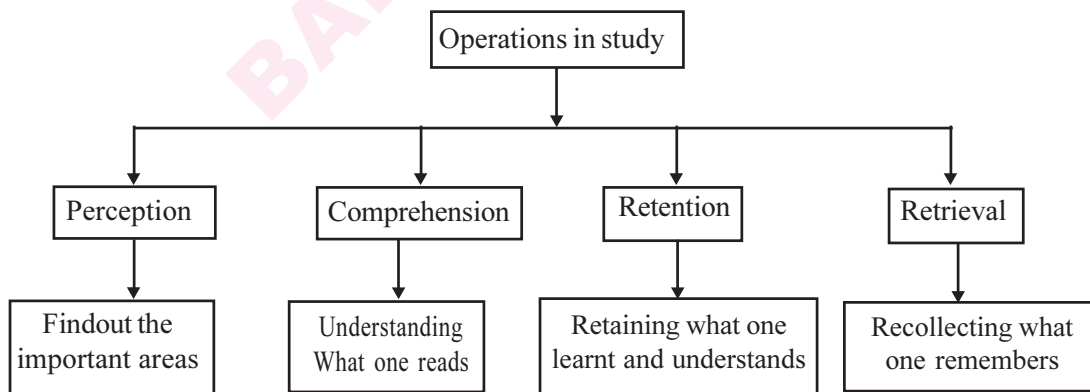

Lecturer : It's all right and best of luck.

**XV) Read the following passage and make notes:****1x5=5M**

The process of study involves four operations- perception, comprehension, retention and retrieval. In other words, you should first perceive what is relevant to your needs and select only those areas which are important. You cannot study everything available in every book you can lay your hands on. Once you have decided on areas, which are important, you have to read and understand- or comprehend the material that you have selected - for no learning can take place without comprehension. What is not understood is not learnt. Comprehension is thus imperative in the process of learning. However, mere comprehension is not enough. What one understands now, may also be easily forgotten later. Hence, you, as a student, have to make special efforts to retain what you comprehend. You also have to retrieve all that you learn throughout the year at the time of examination.
